

This cross-sectional view shows a mechanical assembly. A central component, labeled 116a, is a cylindrical part with a central bore. It is surrounded by a housing or support structure, labeled 116b. The housing has a flange or base, labeled 116c. A central shaft or pin, labeled 117, passes through the assembly. A component, labeled 118, is positioned between the central part and the housing. A component, labeled 119, is positioned between the central part and the housing. A component, labeled 114, is positioned between the central part and the housing. A component, labeled 115, is positioned between the central part and the housing.
